HF 500 SERIES

1/2" PITCH, RUBBER SURFACE , FULL COVER

DEDICATED WIDTHS AND MODULAR BELTS

This belt is specifically designed for packaging lines: stop belts, metering belts...
The special patented rubber retention system guarantees reliable and durable operations.

The rubberized area is maximized, both in the transversal and longitudinal directions (reduced gaps between the rubber pads).

The 1/2" pitch is the best solution for head transfer of products over a nose bar.
HF 500 belts use the same sprockets as the Matveyor® 600 series.
